Technical Program

BP Hosts the global oil & gas industry in London

If you need further information please call us at 1 (281) 491-5900 or visit www.mcedd.com

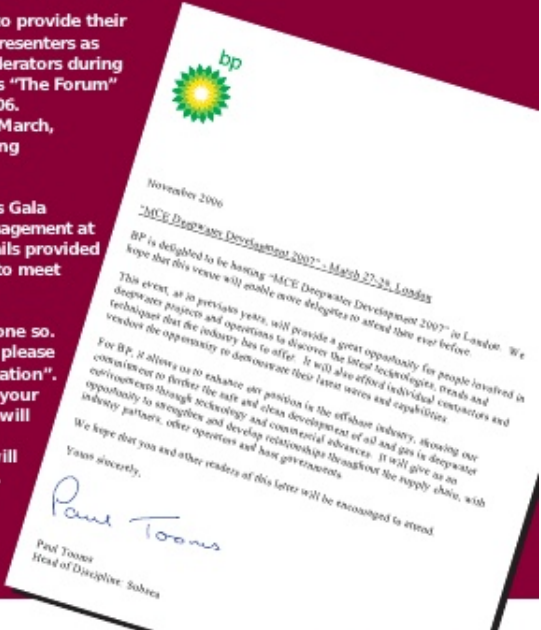

Welcome to MCE Deepwater Development 2007, and "Welcome to London". In March, delegates from 25+ countries, representing 150 companies, converge on one of the world's great cities. As the Global Headquarters of our 2007 Host, BP, London provides a picturesque backdrop, as well as fast-paced business environment that appeals to the world.

Our Advisory Committee has crafted a world-class program fitting a conference that has been recognized globally as one of the industry's most anticipated events. The technical program "kicks-off" with "The Forum" on 27 March. Opening presentations by BP, Acergy, Marsh and Legge, Farrow (contract attorneys) cover Issues faced by Operators and Contractors, while also providing a background on Risk/Insurance and Legal Affairs that must be considered when planning and executing increasingly larger and more complex developments.

Our Audience Response System allows those in attendance to provide their immediate feedback on questions and issues raised by the presenters as well as the Advisory Committee Members who serve as Moderators during "The Forum". BP's Ice Breaker Reception immediately follows "The Forum" and will be held in an Exhibition area 60% larger than in 2006. The traditional technical program begins on Wednesday, 28 March, continuing through 29 March, with presentations from leading Operators and Contractors.

BP invites all registered "Conference Delegates" to attend its Gala Evening Event. With a welcoming address from BP Senior Management at the historic venue the Royal Courts of Justice (complete details provided at registration) this will be an evening for all in attendance to meet and socialize with the industry's decision makers.

We urge you to register to attend if you have not already done so. Online Registration is now open. If hotel rooms are needed, please visit www.mcedd.com and follow the link to "Hotel Information". The MCE DD room block is rapidly filling up, so please book your room(s) as soon as possible. Executive Coach transportation will be provided to all attendees who have booked their rooms through our online, or call-in system. (Please note coaches will travel between the conference venue and the Hotel Russell).

A Royal Navy sailor who served on nuclear 'Hunter Killer' submarines has used his military know-how to develop a new 'green' car device to slash motorists' fuel bills and harmful emissions.. His resulting compact hydrogen fuel-cell box reduces car emissions by up to 80 per cent and offers fuel savings of up to 20 per cent, according to independent tests.. It produce hydrogen which goes directly into a petrol or diesel engine's fuel/air mix for a cleaner and faster burn that slashes fuel costs and pollution.
